Data Strategy & Security

Introduction

Data has become one of companies' most valuable assets and greatest risks.

The global flow of information creates constantly changing challenges: How do companies acquire, store, protect, use and share data to keep up with the competition, while reducing their legal and reputational risks?

Companies need an experienced and creative partner to work closely with them to formulate and achieve their overall data strategy, whether they are

- Ensuring that they meet their regulatory and contractual obligations to protect data,
- Evaluating the data-related risks and benefits of an acquisition,
- Facing scrutiny over their cybersecurity or privacy policies and practices,
- Responding to investigations or litigation relating to a data breach, or
- Developing an artificial intelligence or big data program.

Ranked as a leading firm for Privacy and Data Security.

“They have longstanding advisers who know how to represent corporations and boards, but are also highly integrated with government experience and meaningful relationships.”

Chambers USA, 2019-2020

Ranked as a leading firm for Cyber Law and Data Privacy & Data Protection.

“Debevoise & Plimpton ‘brings great professionalism, expertise and work ethic’ to its compliance and incident response expertise, and ‘takes great pride in understanding clients and creating and tailoring advice to their specific needs.’”

The Legal 500 US, 2018-2019

Data Strategy & Security Services

The Debevoise Data Strategy & Security (DSS) practice is global and interdisciplinary—combining our cybersecurity, privacy, business continuity, artificial intelligence, M&A diligence and data governance practices into one fully integrated and coordinated group.

Together, we advise leading companies on responding to cybersecurity events, including regulatory inquiries and civil litigation. We also advise our clients on their overall data strategy, including how to protect and optimize the data that they maintain on premises, with vendors and in the cloud. Our strategic advice includes both legal and technical assistance with the data issues that arise in M&A diligence, licensing and vendor contracting. In addition, we help our clients determine what data they should delete or not collect because of cybersecurity, privacy or other risks.

Our integrated strategic advice on data includes:

- Helping clients across the globe prepare for, and respond to, significant data breaches and related investigations and litigation. In addition to our U.S. offices, we serve clients from offices strategically located in the United Kingdom, France, Germany, Russia, China, Hong Kong, and Japan. We also regularly work on matters that involve a wide range of other non-U.S. jurisdictions, including the EU and EEA, Japan, Singapore, Brazil, Canada, Colombia and Argentina, to name a few.
- Identifying existing and proposed laws and standards in the United States and around the world that will impact our clients' use of data, including regulations and guidance relating to cybersecurity, privacy, AI, data minimization, records retention, document discovery and data governance.

Because we lead responses to cyber incidents of all sizes and types globally, and on a continuous basis, we are able to channel that deep experience into helping all of our clients improve their preparations, including by assessing their plans, processes, resources, and ability to respond quickly and effectively to a major cyber breach, operational disruption or other significant data or technology event.

“They’re trusted advisers. Their responsiveness is fantastic and I’m always able to touch base.”

A FULL RANGE OF DATA GOVERNANCE, PROTECTION AND PRIVACY SERVICES, INCLUDING CYBER INCIDENT RESPONSE AND MANAGING AI RISK

Our experience and our services cover the full spectrum of cyber threats and broader technology risks, including cloud providers, insiders, suppliers, and other vendors, business counterparties and competitors, technology outages and other business continuity events, criminal hacking groups and national security threats.

- **360° Incident Response Services.** Debevoise helps clients navigate cyber incidents with the full range of needed services, including immediate crisis management, internal and external communications, fact investigation, breach notification, regulator and law enforcement liaison, civil regulatory investigations, defense of class action and derivative litigation and attention to the needs of the board and C-Suite.
- **Engaging with Law Enforcement in the U.S. and Globally.** We are able to leverage our worldwide network of law enforcement contacts in the event of an incident. Our team includes several former federal cybercrime prosecutors, including the former leader of the Justice Department’s Criminal Division, the former leader of the Department’s response to national security cyber threats, and two former Assistant U.S. Attorneys who brought landmark cyber cases in the country’s federal courts.
- **Review/Refresh Data Policies and Governance.** We can provide an assessment of the company’s policies and procedures for the protection and handling of consumer and employee personal data, with particular attention to mitigation of legal, business and reputational risks.

- **Cyber-, Privacy- and AI-Risk Assessment.** In today's dynamic regulatory environment, managing risks at the intersection of law and technology means measuring data protection and data optimization strategies against existing laws and regulations, as well as anticipated changes in the legal and threat environments. We review companies' cybersecurity, privacy and AI programs and assess them against existing and emerging legal standards. Our work ranges from leading a full legal and technical risk assessment of various data programs, typically performed in tandem with a technical vendor, to a targeted review of areas known to attract regulatory and enforcement focus.
- **Board/Executive Briefings and Training.** We regularly report to boards and company executives on the latest threats their companies face relating to data in order to help them assess risk, allocate resources, maintain appropriate insurance, prevent avoidable losses and discharge their oversight obligations. We also provide training on cybersecurity, privacy and AI risks to new executives and board members, as well as anyone wishing to learn more about their responsibilities in these areas.

- **Mock Data Events and Tabletop Exercises.** We routinely help our clients prepare for cybersecurity and business continuity events by conducting real-world drills of actual data events for various functions within the organization including Legal, Compliance, IT, Risk, Communications, Executive Management and the Board. These Tabletop exercises, which regulators increasingly expect companies to conduct, allow our clients to test their incident response plans and see how their organization works through emergency data events, including ransomware attacks that shut down operations, insider data theft, state-sponsored hacking of sensitive commercial information, leaking of large volumes of customer or employee personal information and compromise of a critical vendor's information systems.

- **Vendor Risk Review.** In many data breaches, the attack vector initially goes through a vendor that has access to a company's network. We can look quickly at significant vendor agreements, and at the policies and procedures for administering vendor relationships, and advise on how they might be updated to mitigate cyber/privacy risk.
- **M&A Due Diligence.** Cyber risks are increasingly prominent in M&A due diligence and in the post-acquisition integration process. We often lead cyber, privacy and AI diligence investigations around the world, including advising on policies and procedures for due diligence and for integration generally, as well as on risks and issues raised by specific actual or potential acquisitions and investments.
- **Insurance.** Companies increasingly are concluding that cyber- and privacy-specific insurance policies are essential. Our team has significant experience working inside the insurance industry and can review existing policies to assess coverages and exclusions.

REAL-WORLD EXPERIENCE

Our services are based on experience in the trenches of many of the country's landmark cyber and privacy incidents (including many non-public incidents). Our lawyers have deep technical knowledge that allows them to translate complex technical findings into legal and business decision points. This has enabled us to provide a pragmatic approach to identifying and coordinating the key elements of effective incident response and overall data strategy.

Before joining Debevoise, partner Luke Dembosky served as Deputy Assistant Attorney General for National Security, managing the Justice Department's work on all national security cyber incidents, including the cyber attack on Sony Pictures and the landmark breaches of Target, The Home Depot, Anthem and the U.S. Office of Personnel Management, among many others. At Debevoise, Luke co-chairs the cyber and privacy practice, acting for the firm's clients on high-profile and high-stakes global and U.S. breach matters.
