Core AI Team *Chambers Ranked*

4+ Media & Sports Clients

20+ Insurance Clients

5+ Infrastructure Clients

3+ Other Clients

5+ Consulting Clients

Because we have worked with many clients (and internally) on AI issues for over five years:

➤ We can benchmark where clients are against their peers and show where they're taking on too much—or too little — AI risk.

➤ We are familiar with virtually every AI-related legal issue and can deliver practical advice quickly and efficiently.
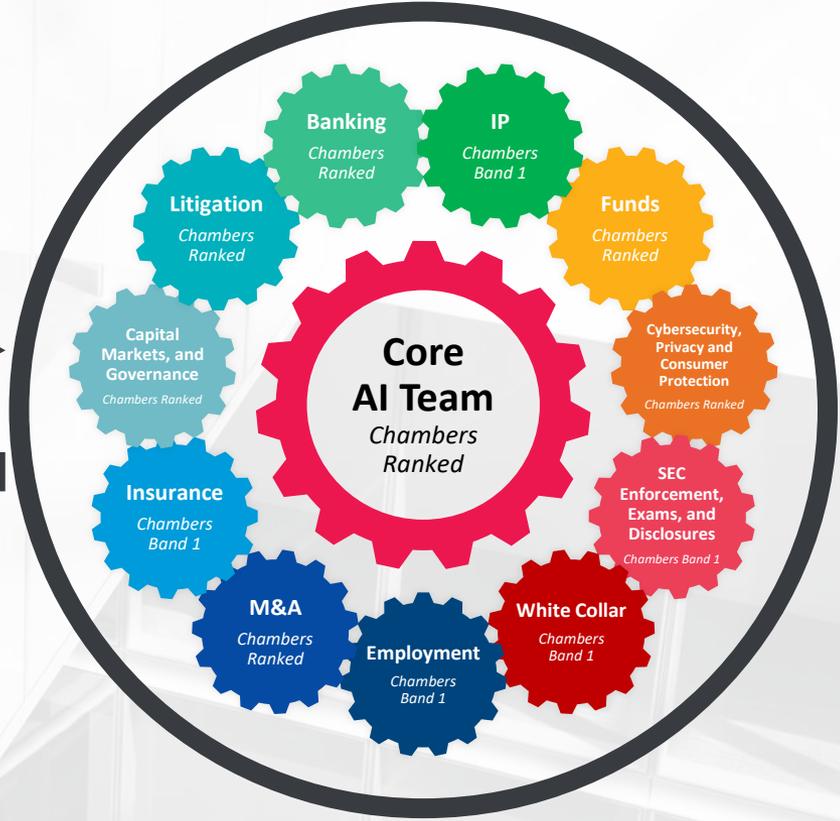

Fully-Integrated Client and Internal AI Practices

What we learn from our external clients about AI adoption, we implement internally, and what we learn from our internal AI adoption strengthens what we deliver to clients. Debevoise's AI-enabled compliance training programs that the practice developed for both internal use and client's in-house legal team, for which Debevoise was named a LegalWeek finalist, are one example of the benefits of this integrated structure.

STAAR

Our [award winning](#) **Suite of Tools for Assessing AI Risk (STAAR)** supports clients in identifying, evaluating, and managing the evolving legal and regulatory risks associated with the development and deployment of AI by bringing together a comprehensive collection of frameworks, guidance materials, and practical tools.
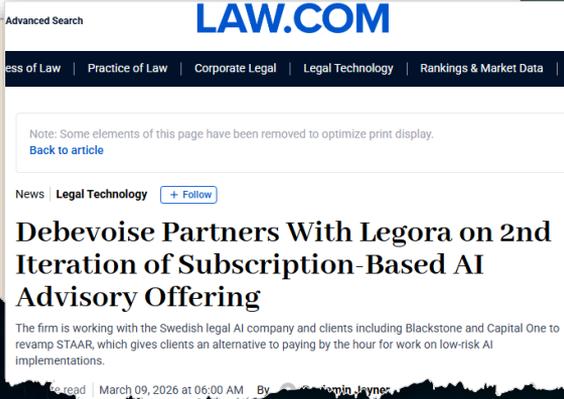

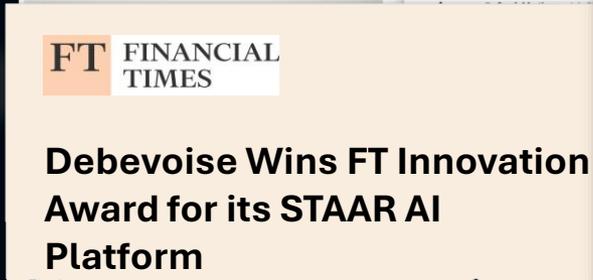

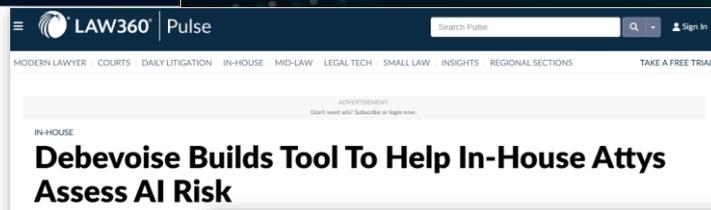

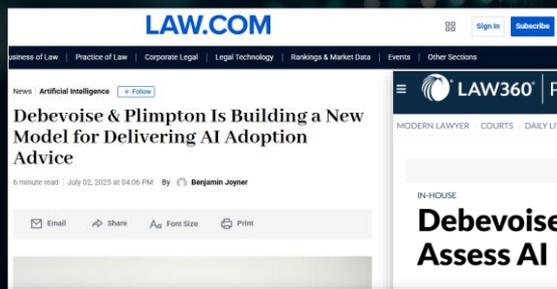

The STAAR platform, hosted by Legora, provides AI-powered searchability across:

A library of generic, vetted AI use cases known as DARTs

Our Menu of policies, protocols, trainings, and guidance related to practical implementation of AI

Lessons learned from three years of generative AI adoption

Regulatory trackers of current AI laws

AI Thought Leadership

Our regular **AI Webcasts** draw hundreds of attendees and often feature guest AI regulators and industry leaders

Our AI attorneys are frequently published and quoted in **leading journals on AI issues**, including *The American Lawyer, Bloomberg, Law360, and Directors & Boards*.

Our **Data Blog** has 3,000 subscribers and contains over 175 articles on AI.

Our **AI CLEs** for clients provide the latest on AI technical and regulatory developments

Our series of onsite **Practical AI Workshops** for clients serve as a hands-on resource, offering organizations a clear view of how advanced AI tools can add value.

Debevoise
&Plimpton

Our AI Leadership Team

Avi Gesser is our **AI Practice Lead** and the Co-Chair of Debevoise's global Data Strategy & Security Group. Avi has been working on AI-legal issues for over 10 years. He is ranked Band 1 by *Chambers USA* for AI and is one of only six lawyers ranked in the top rankings for both *Chambers Global Market Leaders* and *Chambers USA* for AI. He was named an "AI Visionary" by Relativity in its first annual list featuring leaders in AI. Avi is a primary author of the firm's Data Blog and created the pioneering STAAR program for AI clients.

AI-SEC Lead

Charu Chandrasekhar has deep experience advising global financial institutions, investment advisers, and public companies on artificial intelligence governance, compliance, and enforcement, including in matters before the SEC, CFTC, and FINRA.

AI-IP Litigation Lead

Megan Bannigan regularly advises and counsels clients on intellectual property rights and litigation risks related to AI and other emerging technologies, including pertaining to AI training data sets, models, and generated outputs.

AI-EU Lead

Martha Hirst advises clients on AI governance and adoption, and on navigating a broad range of AI-related operational, regulatory and reputational risks, including under the EU AI Act and UK frameworks.

AI-Corporate IP Lead

Henry Lebowitz frequently represents clients in negotiation of AI-related agreements and data licenses.

AI Technical Lead

Matt Kelly focuses on advising the firm's clients on matters related to AI adoption, governance, model development and deployment, compliance, and risk management, as well as cybersecurity and data privacy.

AI Privacy Lead

Johanna N. Skrzypczyk focuses on advising clients on AI governance with a particular focus on the insurance sector. She also advises clients on privacy risks and mitigations when adopting AI.
