

Artificial Intelligence

Debevoise
& Plimpton

AI Adoption Involves Many Different Areas of Law Debevoise Brings Them Together

AI in 2026:
Complex.
Interdisciplinary.
Constantly evolving.

**Debevoise delivers
AI solutions:**

➤ Integrated
expertise across
12+ Chambers
ranked practices

➤ Ability to collaborate
across practice
groups through
our unique
lockstep model

Whatever Your Challenge, We've Probably Solved It Before for One of Our 135+ Clients or Ourselves

Because we have worked with many clients (and internally) on AI issues for over five years:

➤ We can benchmark where clients are against their peers and show where they're taking on too much—or too little — AI risk.

➤ We are familiar with virtually every AI-related legal issue and can deliver practical advice quickly and efficiently.

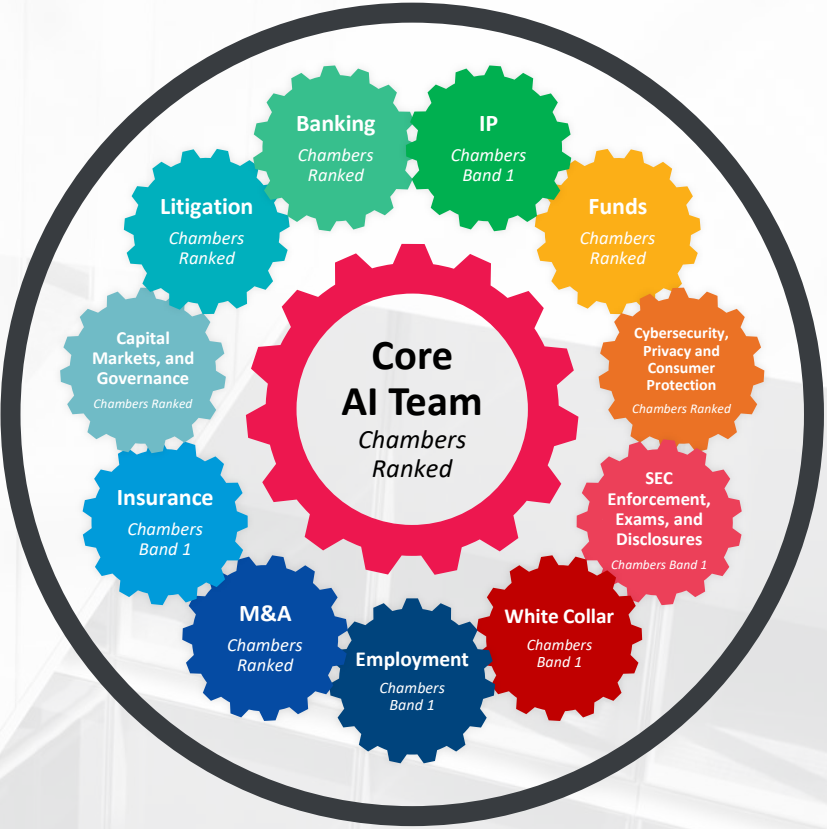

Fully-Integrated Client and Internal AI Practices

What we learn from our external clients about AI adoption, we implement internally, and what we learn from our internal AI adoption strengthens what we deliver to clients. Debevoise’s AI-enabled compliance training programs that the practice developed for both internal use and client’s in-house legal team, for which Debevoise was named a [LegalWeek finalist](#), are one example of the benefits of this integrated structure.

External Clients

Internal Clients

We Provide Clients Practical and Commercial AI Guidance

Our Data Strategy & Security practice offers clients a suite of artificial intelligence ("AI") governance, compliance and incident preparation products and services, as detailed below.

Available

1. Guide for Selecting an AI Policy
2. Sample GenAI Policies
3. GenAI Low-Risk and Prohibited Use Case Library
4. Procedures for Review/Approval of New AI Systems or Use Cases
5. Generative AI Risk/Mitigation Library
6. Inventory of AI Models and Use Cases
7. Cross-Functional AI Governance Committee Charter
8. AI Bias Testing Framework
9. Data Scraping Protocol
10. Third-Party Risk Assessment for AI Vendors
11. HR AI Risk Assessment Framework
12. HR-Specific Intake Form
13. Request Form for New AI Tools
14. Request Form for New AI Use Cases
15. AI Developer/Deployer Assessment & Strategy
16. Fast-Track Approval Protocol for Low-Risk Use Cases
17. Fast-Track Approval Protocol for Low-Risk AI Vendors

Debevoise & Plimpton

1. AI Use Case Risk Assessment
2. AI Vendor Risk Management including Diligence and Contracting
3. Cybersecurity Assessment
4. NDA Negotiation
5. Mock AI Regulatory
6. Review of 10K AI Risk Factors or Form ADV AI Disclosure

Unrivaled trademark practice

Premier, trial tested IP team with a track record of precedent-setting wins

Deep technical fluency in disputes involving large language models

Full lifecycle support for building, commercializing, and defending IP

Trademark and copyright litigation related to the training of AI models

AI IP data licensing agreements, including those related to model training and deployment, and brand protection

AI deal diligence, including IP exposure and data ownership analysis

AI data privacy and scraping issues in connection with model development

Evaluating IP risks tied to the training and deployment of foundation models

STAAR

Our **award winning Suite of Tools for Assessing AI Risk (STAAR)** supports clients in identifying, evaluating, and managing the evolving legal and regulatory risks associated with the development and deployment of AI by bringing together a comprehensive collection of frameworks, guidance materials, and practical tools.

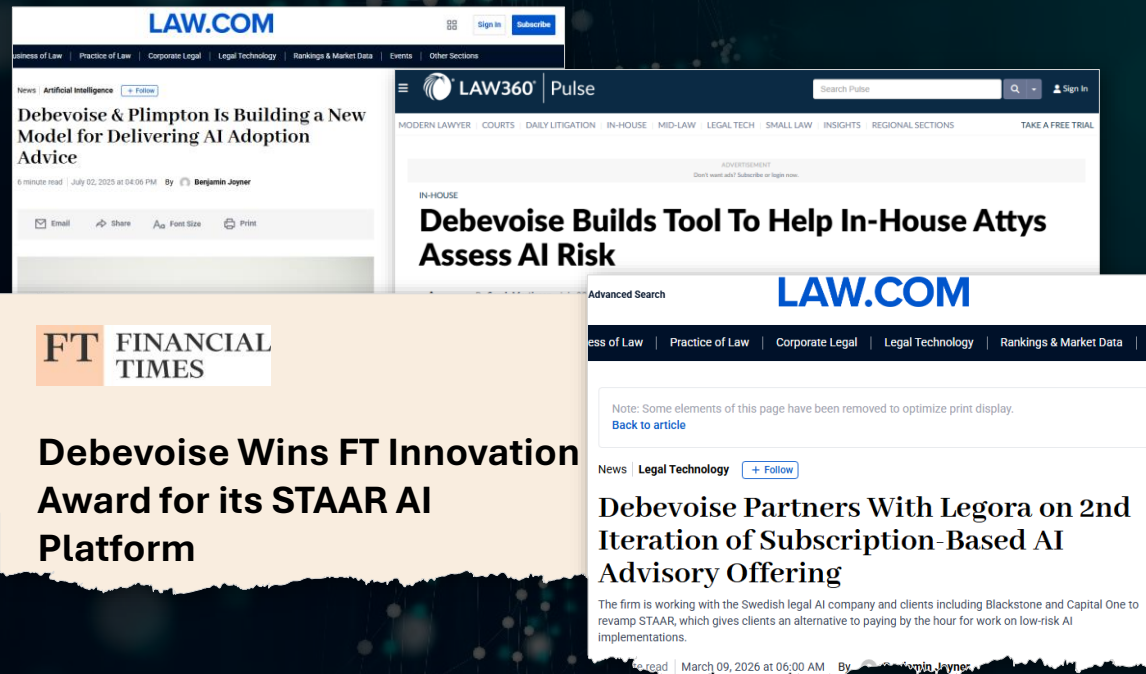

The STAAR platform, hosted by Legora, provides AI-powered searchability across:

A library of generic, vetted AI use cases known as DARTs

Our Menu of policies, protocols, trainings, and guidance related to practical implementation of AI

Lessons learned from three years of generative AI adoption

Regulatory trackers of current AI laws

AI Thought Leadership

Our regular **AI Webcasts** draw hundreds of attendees and often feature guest AI regulators and industry leaders

Our AI attorneys are frequently published and quoted in **leading journals on AI issues**, including *The American Lawyer*, *Bloomberg*, *Law360*, and *Directors & Boards*.

Our **Data Blog** has 3,000 subscribers and contains over 175 articles on AI.

Our **AI CLEs** for clients provide the latest on AI technical and regulatory developments

Our series of onsite **Practical AI Workshops** for clients serve as a hands-on resource, offering organizations a clear view of how advanced AI tools can add value.

Our AI Leadership Team

Avi Gesser is our **AI Practice Lead** and the Co-Chair of Debevoise’s global Data Strategy & Security Group. Avi has been working on AI-legal issues for over 10 years. He is ranked Band 1 by *Chambers USA* for AI and is one of only six lawyers ranked in the top rankings for both *Chambers Global Market Leaders* and *Chambers USA* for AI. He was named an “AI Visionary” by Relativity in its first annual list featuring leaders in AI. Avi is a primary author of the firm’s Data Blog and created the pioneering STAAR program for AI clients.

AI-SEC Lead

Charu Chandrasekhar has deep experience advising global financial institutions, investment advisers, and public companies on artificial intelligence governance, compliance, and enforcement, including in matters before the SEC, CFTC, and FINRA.

AI-IP Litigation Lead

Megan Bannigan regularly advises and counsels clients on intellectual property rights and litigation risks related to AI and other emerging technologies, including pertaining to AI training data sets, models, and generated outputs.

AI-EU Lead

Martha Hirst advises clients on AI governance and adoption, and on navigating a broad range of AI-related operational, regulatory and reputational risks, including under the EU AI Act and UK frameworks.

AI-Corporate IP Lead

Henry Lebowitz frequently represents clients in negotiation of AI-related agreements and data licenses.

AI Privacy Lead

Johanna N. Skrzypczyk focuses on advising clients on AI governance with a particular focus on the insurance sector. She also advises clients on privacy risks and mitigations when adopting AI.
